Kiwi community is now on Discord: (requires Discord app to join)Next release will arrive around 15th Oct. - Fix: Bottom toolbar could get stuck in the middle of the screen- [+] Import and Export Bookmarks from a file- [+] Swipe up on address bar to show Tab Selector- [+] Long-press on Back button to view history- [+] At the bottom of Accessibility preferences, you can enable/disable the simplified Tab Switcher- [+] Cosmetic fixesOctober 04, 2018This version fixes issues on x86 devices (ZenFone, Venue 7) and brings significant speed improvements if you are running an older version.- Improv.: Browsing is very fast- Improv.: Stability & battery usage- Improv.: Background videos now autoplay when screen is locked- Improv.: Adaptive icon- Change: All top toolbar buttons are displayed when Duplex is on- Fix: Content filter (Disqus login, and more)July 14, 2018This version fixes the menu of the bottom bar on certain devices and resolves issues with background play.This is also a new shortcut to open a new tab on long-press on tab stack icon (next to menu)- Upgraded to Chromium 69.0.3477- Feature: Bottom address bar (Settings, Accessibility, phone-only)- Feature: Translate (Main menu)- Feature: Clear data (Main menu)- Improvement: Video player- Improvement: Background playJuly 03, 2018This version is an intermediate release that includes minor fixes.The video player is not the final version. - Upgraded to Chromium 69.0.3462- Fix: Background play- Fix: Status bar color- Feature: AMP remover (Settings, Privacy)- Feature: Open by default in external app (Settings, Accessibility)- Improvement: Night mode stays on after restart (phone-only)- Improvement: If you set more than 100% contrast, text becomes more visible in Night Mode (recommended: 101%)June 15, 2018This version features an improved night mode and unlocks Facebook Messenger (web)- Feature: Facebook Messenger is unlocked on Feature: Night mode grayscale and contrast settingsA contrast of 100% will turn off black pixels on devices with AMOLED screen.- Fix: Dark websites becoming white in night mode- Fix: Images incorrectly displayed in night mode- Fix: Contextual search not working on Google (english-only)- Fix: Annoyances and minor content filter issuesJune 09, 2018This version gives you adblock on/off button (site per site) and several usability fixes (over 40).Thanks to Youssef, Gala, Mickael, Nitan, Sisi, Francois, Gugun, Rasitha, Jd (merci!), Sangkan, 4esterBY and everyone who helped.- Upgraded to Chromium 68.0.3438- Feature: Adblock on/off (Main Menu)- Feature: Exit button- Improved: New Tab Page- Improved: Layout on AMP pages- Fix: Disable News on Homepage- Fix: Forum threads not displayed correctly- Fix: Issue with reCaptchaMay 26, 2018This version is more responsive and feels faster on many devices.It also includes "Night mode", a functionality (experimental) to make websites easier to navigate in low light environments.- Improved: Application responsiveness- Feature: Night mode (Menu -> Turn on Night Mode)- Feature: Disable news on Homepage (Menu -> Home page -> News on Home Page)May 06, 2018* RECOMMENDED UPGRADE *This version resolves most of crashes from the previous release.This version is faster (up to 200 ms per every click) so navigation is more responsive.Also contains:- Feature: Setting to close all tabs on exit- Improved: Doesn't ask anymore access to Google account- Improved: Takes much less space on disk- Improved: Removed annoyances on Quora, NDTV, Prothomalo, Hamariweb and more- Improved: Auto-dismiss "Add to Home Screen"April 27, 2018- Upgraded to Chromium 67.0.3395- Much faster release- Fix: Clicking on button on websites did not react.- Fix: "More results..." button from Google Search not visible.- Feature: Home page button.- Feature: Screenshots work in Incognito mode.- Feature: Delete history older than 30 days.- Improved: Stability- Improved: YouTube, Maps now play by default in Kiwi.- Improved: Search terms in the top bar instead of the full URL.- Improved: Menu when you long press on an image, or a link, April 14, 2018Fixed ANR on First Start Screen-Fixed Privacy Policy and Terms of Service linkKiwi Browser is made to browse the internet, read news, watch videos and listen to music, without annoyances.Browse in peace.Kiwi is based on Chromium and WebKit, the engine that powers the most popular browser in the world so you won't lose your habits.We hope you'll love Kiwi as much as we do.Note for power users and supporters: We have a Discord (chat) community where you can discuss development and share ideas: Features: ★ Based on the very best Chromium ★ Incredible page load speed Thanks to our very optimised rendering engine, we are able to display web pages super fast. This release fixes Google Play Store links not properly opening and automatically clear homepage tiles from cache when the images haven't been loaded for 7 days (to save disk space).Have a good day!Arnaud,February 16, 2021This release resolves 2 new security issues that exists in all Chromium-based browsers (including Kiwi Browser and Google Chrome) that are called CVE-2020-16009 and CVE 2020-16010.There are also minor technical updates in components (dependencies) used in the browser.Have a good day!Arnaud,February 07, 2021This release resolves 2 new security issues that exists in all Chromium-based browsers (including Kiwi Browser and Google Chrome) that are called CVE-2020-16009 and CVE 2020-16010.There are also minor technical updates in components (dependencies) used in the browser.Have a good day!Arnaud,December 17, 2020This release adds support, on most devices but not all, for playback of Widevine protected content (Netflix, Amazon Prime, Spotify, etc) and fixes news articles on the homepage sometimes not loading.This release also updates the layer that the browser uses to communicate with Android (Android Target SDK).This release of Kiwi is still compatible until Android 4.1 as I try to keep it compatible even though it's a small number of users.Enjoy!Arnaud,November 05, 2020This release resolves a security issue that exists in all Chromium-based browsers (including Kiwi Browser and Google Chrome) that is called CVE-2020-15999. ★ Powerful ad blocker that removes most of intrusive ads (you can enable it in Settings, Ads or use any extension of your choice) ★ Super strong pop-ups blocker that really works ★ Cryptojacking protectionThe first Android browser that blocks hackers from using your device to mine crypto-currency ★ Unlock Facebook Web MessengerGo to m.facebook.com and chat with your friends without having to install FB application.More goodness: ★ Night mode with customizable contrast and grayscale mode. ★ Disable AMP (Settings, Privacy) ★ Block annoying notifications ★ Block slow and invasive trackers to protect your privacy.- (extensions) Added partial support for Opera experimental Desktop extensions.October 01, 2020This version supports text rewrap / reflow (adapt text based on zoom level).+ Interface and animations are really improved+ Better performance (new GPU driver and 64-bits engine)/New settings:+ Google Translate, Yandex and Baidu (Settings, Translator)+ Possibility to add exceptions / whitelist in content filter+ Support for external download managers+ Show extensions first+ Protect incognito windowsRemember to activate Hide annoying ads in the main menuif you want faster browsing,June 26, 2019This version resolves issue of extensions unloading.On some devices (in particular Xiaomi), extensions may be unloaded by the system when the device wants to optimize memory.During the optimization, the device (Android) chooses what processes to disable.In this new release of Kiwi: Kiwi indicates to Android that if Android wants more memory, it should try to avoid disabling the current active tab and the extensions.If the extensions are disabled by Android, Kiwi will try to reload them.May 25, 201919th May update:Better stability, more performance improvements, correcting "Sandboxing not allowed" error messages.+ 17th May update:This version fixes Craigslist and adds support for Import / Export on the new tab page.It also brings performance improvements and fixes an issue with the Search Widget in Night Mode/Black theme.Support for extensions has been improved as well (chrome.tabs.onCreated/onUpdated/onRemoved).May 18, 201910th May update: Fixed homepage news, improved stability & the way extensions are shown & a couple of small bugs.Happy to announce that Kiwi is back on the store!We are now over 300,000 active users.The bad news: Background play is now disabled on YouTube (request of Google Play).The good news: This version has better performance, new content filters, better extensions support and introduces a Diamond Black theme.- (browsing) Fix for a minor issue related to Twitter windows not opening. If you have any suggestion for Kiwi, please let me know, I'm reading every single comment (I don't reply everywhere as it's done one by one) and this is very helpful to shape the product.If you have a lot of suggestions, you can also join the Discord community.Have a great day and keep sharing Kiwi!Arnaud,October 10, 2020This new version focuses on:- (general) Improved two important stability issues (screen rotation, and GPU freezes)- The feedback has been positive on this, but if you still have an issue, feel free to reach out and we can try other solutions together. ★ Import / Export bookmarks. This issue was disclosed by Google on 2020-10-21 so we are rolling an update so you can have the fix.Have a good day,Arnaud,October 31, 2020This release resolves a security issue that exists in all Chromium-based browsers (including Kiwi Browser and Google Chrome) that is called CVE-2020-15999. 100% contrast = pure AMOLED black (actually turns off pixels) - recommended! 101% contrast = pure AMOLED black + white text ★ Bottom address bar ★ Manage websites that appear on the homepageLong-press to move or delete the tiles, click the [+] to add a new website.- (browsing) Fix related to Facebook Messenger web edition. The homepage is compatible with Dark Reader.May 10, 2019Happy to announce that Kiwi is back on the store!We are now over 300,000 active users.The bad news: Background play is now disabled on YouTube (request of Google Play).The good news: This version has better performance, new content filters, better extensions support and introduces a Diamond Black theme. Please help us by sending a little e-mail if you see crashes, bugs or just want to say Hi ☺=Made in Estonia ★ Custom Downloads folderChoose where your downloaded files are stored.Note: On certain Android versions, when you uninstall an app, Android also removes your downloads.Keep it in mind if you manipulate Kiwi (to backup bookmarks file) or transfer to another device. The homepage is compatible with Dark Reader.May 08, 2019This version includes stability improvements and better extensions compatibility.An issue with downloading PDF files has been resolved, and another issue where the extension window was sometimes connected to the incorrect tab.You can now import .crx/zip files and also user scripts (user.js) directly on chrome://extensions.If you want to use or write your own filters, the extensions Nano Defender/AdBlock offer the best compatibility with Kiwi at the moment (according to the community).April 18, 2019This is the 1-year anniversary release of Kiwi Browser.This version adds support for Extensions.To install a new extension, go to Main Menu, and click Extensions and you'll be able to access the extension store.Learn more at: free to share feedback and comments on Discord or by e-mail.You can support Kiwi by sharing it with your friends, we'd love it!April 16, 2019This version includes the latest security improvements from Chromium (including the FileReader fix)and also: Fix for homepage news- Hindi and Chinese Traditional translation.- Homepage loads much much much faster- Fixed crash "Aw Snap!" that happens on some rare configurations.- Improved stability on Xiaomi devices (GPU crashing)- Smoother animations (yep!) and user experience.If you have any issues feel free to send an e-mail or join the Discord community.Thank you for sharing Kiwi with your friends!March 02, 2019Introducing Reachability: (only if the bottom toolbar is enabled)When you press the Hand icon, it brings the top of the page into reach(page slides down).You can enable or disable the option in Settings, Accessibility.This is similar to the iOS "Reachability" feature+ TLS 1.3 final support+ Faster homepage loading+ Faster tab closing+ Better battery usage+ Better battery usage+ Improved ad blocker, popup blocker.+ Added StartPage in search engines (new installs only)Thank you for sharing Kiwi!February 26, 2019- Change: Slightly refreshed UI (icons / rounded corners)- Improv: Javascript engine is 10% faster than Chromium (try on V8 Benchmark)- Fix: Touch not taken into account (in particular at the bottom of the screen)- Change: Night Mode is default to 100% for new installs- Improv: 101% Night Mode is now White text with differentiated links- Improv: Automatically follow AMP links to non-AMP version if anti-AMP is enabled- Improv: Better memory usage- Improv: 400KB lessand minor bugfixesFebruary 14, 2019- Change: Slightly refreshed UI (icons / rounded corners)- Improv: Javascript engine is 10% faster than Chromium (try on V8 Benchmark)- Fix: Touch not taken into account (in particular at the bottom of the screen)- Change: Night Mode is default to 100% for new installs- Improv: 101% Night Mode is now White text with differentiated links- Improv: Automatically follow AMP links to non-AMP version if anti-AMP is enabled- Improv: Better memory usage- Improv: 400KB lessand minor bugfixesFebruary 11, 2019This version adds new gestures and improves the homepage.You can now go back/next, just by swiping left or right on the edge of the page.This can be enabled/disabled in Settings, Accessibility.- Feature: Edge swipe to navigate history- Feature: Improved news system (and can change news region)- Fix: Improved content filters- Fix: Bottom toolbar blinking- Change: Swipe-up to open tab switcher is off by default (configurable in Settings)Hint: You can switch tab by swiping on the toolbar.January 30, 2019This release includes a fix in Tablet Mode and improvements to Night Mode and major stability fixes for Android 8.0+ Improv: Speed and stability- Improv: Settings in Night Mode are now dark- Improv: Responsiveness when searching or changing page- Change: Contextual Search is disabled by default- Fix: Crash on Android 8- Fix: Simplified View setting is now functional- When bottom toolbar is enabled, action buttons are now located at the bottom (to be reachable with fingers)January 20, 2019This is the 26th stable release of Kiwi Browser.Wishing you the best for 2019 - Feature: Exit browser when last tab is closed (Settings, Privacy)- Improv: Changing the Home page also changes the New Tab Page.- Fix: Crash on Samsung devices- Fix: Czech and Croatian translations- Fix: Annoyances and cookie messages- Feature: Integration with DuckDuckGo and Bing (some users only)Tip: You can now switch back to the classicNew Tab Page by setting chrome://newtab as homepage in SettingsDecember 17, 2018Happy holidays to everyone!Kiwi has now reached half a million downloads.Long awaited, you can now add and remove tiles/websites on the homepage[+] Manage tiles on the homepageLong-press to move or delete the tiles.Important: to remove the news, just click on the cross (it's not deep in Settings anymore).[+] Added Finnish translation[+] Uses less data[+] TLSv1.3 (better security)[+] Improved content filter[+] Improved privacy: Removed metrics / analytics SDK (0 tracking)December 11, 2018Good news! New release is already here, with Night Mode 2.0!Thanks to the Kiwi community and contributors[+] Added Japanese, Portuguese (Brazil), Russian, Turkish, Vietnamese[+] Significant improvements to Night Mode[+] Better compatibility with Android P[+] Much better filter against intrusive ads[+] Resolved issue with reCAPTCHAPro-tip: in Settings, Accessibility you can choose the Contrast level.You are welcome on Discord (chat) for feedback.Next release +/- 12th NovOctober 23, 2018Happy release! Next release on 30th Oct[+] Added Croatian, French, Italian and Spanish (thanks to contributors!)[+] Improved privacy (new hosts in blacklist, user-agent same as Chrome)[+] Fix Custom Tabs bottom bar[+] Fixed Yandex, PayPal Communities, and more.[+] Minor improv. This issue was disclosed by Google on 2020-10-21 so we are rolling an update so you can have the fix.Have a good day,Arnaud,October 22, 2020This version resolves an issue with the news on the homepage that could appear incorrectly and a minor issue with extensions compatibility. ★ Supports many extensions==Advanced users:If you want to open links with an external application, you can long-press on the link, or change the default setting in Settings, Accessibility.To add a new search engine, go to your favorite search engine, and do a couple of searches, and then go to Settings, Search Engine.==Kiwi Browser is very new, and still in test. to night mode[+] Improved stability on Samsung[+] Support for latest emojis[+] Experimental: For 5% of the users, you can now use shortcuts, like !gt for Google Translate and try a minimalistic version of search.October 22, 2018Happy release! Next release on 30th Oct[+] Added Croatian, French, Italian and Spanish (thanks to contributors!)[+] Improved privacy (new hosts in blacklist, user-agent same as Chrome)[+] Fix Custom Tabs bottom bar[+] Fixed Yandex, PayPal Communities, and more.[+] Minor improv.
